SUMMARY

Senior Product Manager with 9 years of consumer product experience. Led subscription payment infrastructure and creator lead-generation tools at TikTok LIVE; built a multi-million-user paid membership system at Ctrip (Trip.com Group). Experienced in productizing AI models into user conversion workflows. 3 years in an English-speaking work environment.

EXPERIENCE

ByteDance · TikTok LIVE | Product Manager | Jul 2022 – Present

Led subscription payment in early phase, building pricing infrastructure and user conversion. Later transitioned to lead-generation business, helping service-oriented creators (lawyers, coaches, designers) acquire potential clients through live streaming. Owned creator lead-generation tools and platform governance. Coordinated 6+ cross-functional teams to drive projects to launch.

Ctrip (Trip.com Group) | Product Manager | Jul 2017 – Jul 2022

Led WeChat Mini Program growth (10M+ DAU during Chinese New Year); then served as membership & platform product lead (5-person team), building paid membership and loyalty system from scratch; later led new product line (4-person team). 5 promotions in 5 years.

KEY PROJECTS

DM Conversion Optimization with AI | TikTok LIVE | Sep 2025 – Present

- **Context:** Creators could acquire leads via DM during live streams, but lacked effective conversion and engagement tools, causing high-intent user drop-off and loss of conversion signals.
- **Approach:** Diagnosed 3 funnel breakpoints (no real-time response / no standard scripts / high-intent users unidentified). Shipped DM toolkit (auto-greeting / quick-reply / keyword-response) + real-time lead dashboard. Productized AI intent model — defined intent taxonomy, coordinated model training, deployed auto-trigger with comment-to-DM pre-fill for one-click send.
- **Results:** DM conversion +35%, per-creator lead rate +25%, active DM retention +10%

Open Platform for Lead Generation | TikTok LIVE | Jun 2025 – Present

- **Context:** Structural conflict between platform-built tools (65% commission) and creators' existing third-party tools (Calendly/Stripe at 3-5%), causing creators to redirect users off-platform and resulting in attribution loss.
- **Approach:** Shifted from building competing native tools to open platform. Ran dual-track MVP: 3rd-party link pilot for top creators + Calendly booking integration. Delivered strategic proposal covering experiment findings, decision framework, and monetization projections; aligned with leadership on open platform roadmap.
- **Results:** Lead tool CTR +100%, Calendly integration streaming retention +12~16pp

Subscription Payment Infrastructure (0→1) | TikTok LIVE | Jul 2022 – Oct 2024

- **Context:** TikTok LIVE subscriptions only supported fixed pricing with limited payment options, resulting in lower subscription rates vs. competitors.
- **Approach:** Three-phase buildout — custom pricing → multi-tier plans with upgrade/downgrade billing → personalized pricing and discount recommendations. Redesigned creator onboarding and benefits configuration flow.
- **Results:** Subscription rate +12%, revenue +10% (A/B tested)

Paid Membership System (0→1) | Ctrip | Jul 2018 – Jan 2022

- **Context:** Train ticket users' core anxiety was "unable to secure tickets" — no paid product addressed this directly.
- **Approach:** Designed benefits around "anxiety → certainty" — ticket booking (priority access + first-order money-back guarantee), regular trips (cashback + lower berth + free cancellation), corporate travel (fast security + free receipt mailing). Built usage-based tier system + points redemption loop. Designed trial mode for conversion.
- **Results:** ~10M paying members, revenue +480% YoY, nominated for company-wide 2020 CEO Award. Tier system user value +8%, points system +6%

AI PRACTICE

- **Data monitoring:** Auto-generated SQL via Claude Code + Lark CLI, automated top-creator data retrieval, live case review, and scheduled report delivery
- **PRD workflow:** Auto-generated PRD frameworks and prototypes with Claude Code + Claude Design; auto-updated PRDs based on review meeting notes
- **AI Live Interactive Game:** Designed core interaction and AI content generation pipeline — real-time comment classification → narrative generation → host-viewer sync. Built and shipped playable demo in 1 day. TikTok LIVE 2026 Hackathon Champion

EDUCATION

Dalian University of Technology · M.S. Environmental Science & Engineering · 2014 – 2017

Southeast University · B.E. Environmental Engineering · 2010 – 2014

SKILLS

- **Tools:** Figma, Axure, SQL, Excel, Claude Code
- **Languages:** English (TOEFL 98, PTE 72, TOEIC 900), Mandarin (native)
- **Methods:** A/B testing, data-driven decision making, go-to-market strategy, cross-functional coordination, zero-to-one product development, business strategy, conversion optimization
- **Interests:** Licensed busker (street musician)
